

## Introduction

When it comes to speedy colour printing – an essential task in the modern office – the bizhub C30P really shows its talents! Performing admirably in colour and black & white, it impresses with speed and versatility: Options like duplex printing, an extended paper supply and finishing capabilities not available on any other device in its class turn it into a real workgroup printer.

As such, the flexible bizhub C30P perfectly complements larger output systems – whether as small networked device or as convenient desktop printer for instant output from one or more workstations.
