The essentials of imaging

MINOLTA

**The office ace**

**DiALTA**

## The printer that copies and scans...

The DiALTA Di200 is the ideal business communication centre for small or medium-sized workgroups – not just because of the four communication functions it provides from a single machine: printing, copying, scanning and e-mailing. This Di200 also offers office users a number of features that are far from common in a 20-ppm machine: paper-saving duplex printing, a large, highly intuitive touch-screen user interface, space-saving compact footprint and frustration-beating job-separation function for print and copy jobs. The Di200 from Minolta – your office ace.

# ...and saves you time, money and space

Most offices have several different devices for routine communication tasks: desktop printers, a department copier and flatbed scanner. Different locations, different consumables, different service contracts – and in many cases no more than average performance despite such devices’ “specialised functionality”. The Di200, in contrast, applies the principle of “less is more”.

## Compact space-saver

The Di200 has been designed with cramped offices in mind. Its small footprint, made possible through using an internal output tray, means you have one machine instead of at least three, and a compact one at that.

## Versatile performer

Despite its 4-in-1 functionality – printing, copying, scanning and e-mailing – the Di200 offers a number of performance features not usually found in a 20-ppm machine: duplex printing, A3 output, separation of copy and print jobs and criss-cross sorting\*. So though the Di200 helps you save on quantity, you won’t need to compromise on quality.

## Cost-cutting printer

Many businesses are unaware of the true cost of operating desktop printers – the cost per page of printing via a desktop printer is actually remarkably high. The Di200, in contrast, prints at the significantly lower price per page of copying.

\*Additional cassette required.

## Time-saving machine

Although the Di200 is a digital printer-copier-scanner, any user can replace its consumables. So nobody has to wait for a technician to put in a new engine drum. Lengthy downtime is a thing of the past with this office communication centre.

**Concerned about the efficiency of your office communication workflow? The Di200 is the trump card your business needs.**

# The intelligent approach to printing...

The Di200 offers workgroups a number of advantages over desktop printers, e.g. A3 output, criss-cross or shift sorting and a built-in copier. A printing solution that makes sound business sense.

## ...and workgroup copying

## Easy network administration

Minolta's PageScope software makes light work of printer administration throughout your entire computer network. It allows users to monitor and control their print jobs directly from their PC via a web browser.

In the same way any IT administrator can even install printer drivers on all workgroup PCs, monitor all networked devices and analyse daily print volumes.

### How you benefit

- Full feature support in print mode
- Printer administration via web-browser

If your workgroup copier is too slow to serve a variety of users and lacks the sophisticated functions the fast-moving business world needs, it's time you took a closer look at what the Di200 has to offer.

## Sophisticated copying

Minolta's Di200 reproduces images in outstanding quality – not only because it photocopies at a high-resolution 600 x 600 dpi. Its crisp scans cannot be affected by external factors, such as sunlight, and digital technology also gives you more scope for creatively processing scanned images, e.g. book copy or job recall.

## Time-saving image memory

The Di200 is equipped with a digital image memory that gives you numerous creative and productive functions. Scanned documents, for example, can be printed as many times as you want and scanned data rotated through 90° before printing. In other words, you don't need to worry about scanning originals the same way round as the paper in a specific tray – a feature that reduces the number of mis-copies.

### How you benefit

- Superior copy quality
- Digital image memory
- "Scan once, copy many"

# Flexibility in scanning...

If your office has been using a conventional flatbed scanner, you'll appreciate the benefits the Di200 brings. Its automatic document feeder, for example, means you won't have to waste any more time scanning documents in sheet by sheet. A degree of sophistication your business deserves.

## Need-oriented scan modes

As a networked communication centre, the Di200 offers you more than mere scanning and storing of documents – you can choose the scan mode to suit your specific requirements. For example, you may want to scan a document and send it off by e-mail\*. Or with larger sets of documents or those required by numerous users you may want to transfer what you have scanned to a corporate server and notify potential users – no problem with the Di200.

\*mail server with a local SMTP server required

## Efficient scan management

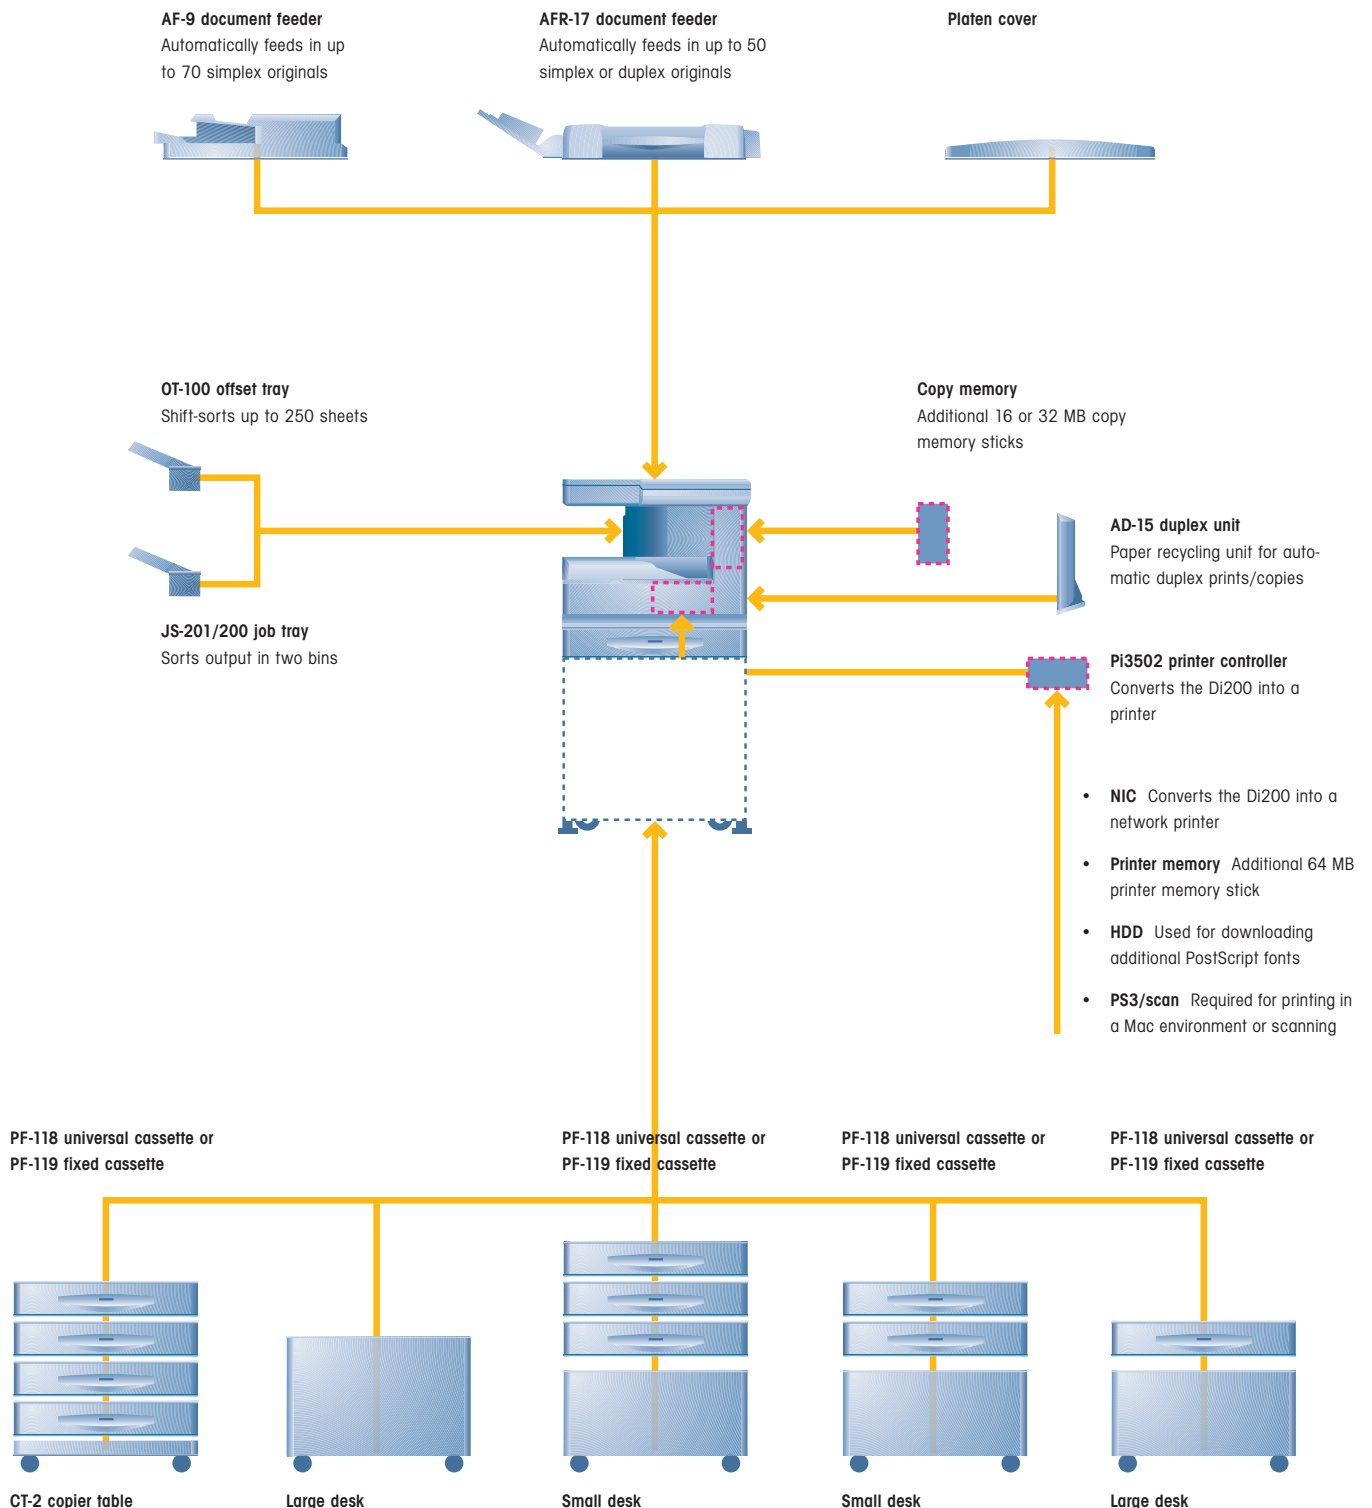

By supporting your entire scanning workflow the Di200 again proves it is much more a mere scanner. Minolta's scanning software, PageScope Cabinet, works like a visual desktop to facilitate the process of filing, searching for and passing on documents. For example files are displayed as thumbnail images and can be easily printed or sent by e-mail via a simple drag&drop function.

## How you benefit

- Automatic document feeding
- Versatile scan modes
- Scan management software

# ...and your choice of accessories

At Minolta we believe that what you want should be what you get. So the Di200 comes with a wide range of accessories so you can choose precisely the machine your office needs.

# DiALTA Di 200

## Copier specifications

### Copying system

Laser electrostatic

### 1st copy

Less than 5.8 sec. (A4 crosswise)

### Copy speed A4

Up to 20 copies/min.

### Copy speed A3

Up to 12 copies/min.

### Copy resolution

Max. 600 x 600 dpi

### Gradations

256 gradations

### Multiple copy

1-99, countdown, interruption mode

### Magnification

25% - 400% in 0.1% steps

### Copy memory

Standard: 16 MB

Max. 64 MB

### Copy features

2-in-1, x/y zoom, image rotation, sorting, separate scanning

## Printer specifications (optional)

### Print speed A4

Up to 20 prints/min.

### Print speed A3

Up to 12 prints/min.

### Print resolution

Max. 600 x 600 dpi

### Page description language

PCL 5e, PCL 6, PS 3 (option)

### Interface

Parallel (IEEE1284), 10/100Base-T

### Print memory

Standard: 16 MB

Max. 144 MB

### Printer HDD

6 GB (for PostScript font downloading)

### Operating systems

Windows 95/98/2000/ME/XP/NT4.0, Mac OS 7.5.3 or higher, Linux

### Network utilities

PageScope, PageScope Light, PageScope Cabinet

## Scanner specifications (optional)

### Scan speed

Up to 35 scans/min.

### Scan resolution

Max. 600 x 600 dpi

### Scan modes

Scan-to-FTP

Scan-to-URL

Scan-to-eMail\*

\*Mail server with local SMTP server required

## System specifications

### Automatic document feeder

Max. 70 sheets

### Output paper size

A6 to A3

### Paper weight

60 - 160 g/m<sup>2</sup>

### Paper input capacity

Standard: 251 sheets

Max. 2,251 sheets

### Sheet bypass

Single-sheet bypass

### Duplex

Optional

### Output capacity

Max. 350 sheets

### Finishing modes (optional)

Sorting, job separation

### Warm-up time

Less than 60 sec.

### System dimensions (W x D x H, mm)

594 x 707 x 542

### System weight

Approx. 49.6 kg

All specifications relating to paper capacity refer to A4-sized paper of 80 g/m<sup>2</sup> quality.

All specifications relating to scanning, copying or printing speeds refer to A4-sized paper that is scanned, copied or printed crosswise in multipage, simplex mode.

The memory capacities listed refer to A4-sized paper with the toner coverage detailed in the respective foot note.

Some of the product illustrations contain optional accessories.

Minolta does not warrant that any prices or specifications mentioned will be error-free.
